Aluminum = 55/60 Ft-Lb. [74/81 Nm]
# SHUTTLE VALVE, BRAKE RELEASE
## SPOOL TYPE, SPRING CENTERED.

## DESCRIPTION
This unit is a SCREW-IN CARTRIDGE TYPE, SPOOL TYPE, THREE POSITION, SPRING CENTERED, BRAKE RELEASE SHUTTLE VALVE which may be used on a hydrostatic transmission to direct charge pump oil to heat exchanger or to tank.

## OPERATIONS
This valve with its internal pilots at port 2 or port 4 will allow flow to port 3 from the opposite port which is piloted with high pressure, thus removing oil from low pressure side for cooling or filtration purposes. This valve is spring centered when both pilot pressures are equal. This valve shifts in open transition.

## FEATURES AND BENEFITS
A hardened steel spool and a hardened steel bore assures rugged and reliable performance. All external carbon steel parts are plated for longer life against the elements. All cartridge valves are 100% functionally tested. Industry common cavity.

## SPECIFICATIONS
